DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The purpose of the examiner's amendment was to correct informalities in the specification, claims and drawings to place this application in the condition for allowance.
2. The application has been amended as follows:

IN THE SPECIFICATIONS:

- The abstract of the disclosure has been combined into a single paragraph format as required by MPEP § 608.01(b).
- -- This application claims priority to a 371 of PCT/JP02/10910, filed on October 22, 2002 -- has been inserted as a first sentence in the specification.

IN THE CLAIMS:

In claim 1:

- Line 5: -- the -- has been inserted before "same".

3. The following changes to the drawings have been amended as follows:
 - Each of Figure 6 and Figure 7 should be labeled as Prior Art as disclosed in page 12, lines 18-23 of the specification.
 - In FIG. 7: "116" has been replaced with -- 115 -- as described in the first and second paragraphs on page 3.

In order to avoid abandonment of the application, applicant must make these above drawing changes.

REASONS FOR ALLOWANCE

4. Claims 1-8 are allowed.

5. The following is an examiner's statement of reasons for allowance:

With regard to claim 1, the prior art does not teach or render obvious the claimed electric potential fixing apparatus in combination as claimed including:

- A voltage supply unit, having at least two high impedances, operable to maintain constantly electric potential of the connection line, holding a total amount of electric charge of the first capacitance and the second capacitance.

With regard to claim 2, the prior art does not teach or render obvious the claimed electric potential fixing apparatus in combination as claimed including:

- A voltage supply unit, having at least two high impedances, operable to output the same electric potential as electric potential of an operation signal applied to the connection line.

With regard to claim 7, the prior art does not teach or render obvious the claimed electric potential fixing method in combination as claimed including:

- Electric potential divided using at least two high impedances as output electric potential, the output electric potential is applied to the connection line between the two capacitances and the output electric potential is fixed at output potential at

which there is no input and output of electric current to and from the connection line.

With regard to claim 8, the prior art does not teach or render obvious the claimed electric potential fixing method in combination as claimed including:

- Electric potential divided using at least two high impedances as output electric potential, the output electric potential is applied to the connection line between the two capacitances and the output electric potential is fixed at output potential at which there is no input and output of electric current to and from the connection line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
